Kurdish

English

Arabic

ABOUT ME

I am a Computer Science graduate with a passion for software development, artificial intelligence, and data science. I specialize in creating clean, efficient code and developing solutions that blend technical excellence with user-centric design. With experience in both frontend and backend development, as well as machine learning and deep learning, I am eager to join a forward-thinking team where I can continue to learn, grow, and contribute to impactful projects.

WORK EXPERIENCE

Freelance Full Stack Developer
Remote | Self-employed
Jan 2023 – Present
- Developed custom websites and web applications using React.js, Flask, and Django
- Built RESTful APIs and integrated MySQL, PostgreSQL, and MongoDB databases
- Designed responsive user interfaces with HTML, CSS, Tailwind, and Bootstrap
- Delivered full-stack solutions for clients in retail, education, and service sectors

Freelance AI & Data Science Projects
Remote | Project-based
2022 – 2024
- Built machine learning models for classification, regression, NLP, and computer vision
- Utilized TensorFlow, PyTorch, scikit-learn, pandas, NumPy, and matplotlib
- Handled complete pipelines: data preprocessing, training, evaluation, and reporting
- Presented findings through Jupyter Notebooks, visualizations, and client-ready dashboards

IT Intern (Summer Training)
Nawroz University – Duhok
July 2024 – August 2024
Participated in the university's official IT summer training program
Designed and developed a POS (Point of Sale) system with full database integration
Gained hands-on experience in system analysis, full-stack development, and deployment
Collaborated with staff to improve campus software infrastructure and digital services
Delivered technical documentation and live demonstrations to department heads
